**SOLAR POWERED
KEYHOLE LIGHT**

POWERplus® Bug

Solar Powered KEYHOLE LIGHT

With the Bug from POWERplus you always come home to a safe welcoming light at night. The Bug lights your keyholes and locks, making it simple, quick and easy to unlock your door. Simply press the Bug and the powerful built-in LED provides a bright light to make your keyhole and lock visible at night. After 25 seconds the Bug will automatically turn off.

During daylight the Bug will charge itself with the integrated powerful solar cell. So you never need batteries for this clever device.

Simple installation by using the strong self adhesive pad. Simple, safe and easy to use.

Push to illuminate keyholes and locks
